

IN THE CLAIMS:

Please REPLACE claims 23, 24, and 54 in accordance with the following:

Sub B5
A2

23. (ONCE AMENDED) A micro-lens built-in vertical cavity surface emitting laser (VCSEL), comprising:
a micro-lens integrally formed on a laser beam emitting surface of the VCSEL emitting a parallel light beam and disposed in a window region through which the light beam is emitted;
a lens layer comprising the micro-lens and formed on the laser beam emitting surface of the VCSEL; and
an upper electrode formed on a portion of the lens layer excluding the window region.

A2

24. (ONCE AMENDED) The micro-lens built-in VCSEL as recited in claim 23, further comprising:
a substrate;
a lower electrode formed underneath the substrate;
a lower reflector;
an active layer comprising a light generating region; and
an upper reflector comprising a relatively lower reflectivity than that of the lower reflector,
wherein the window region is defined by the upper electrode and the micro-lens.

A3

54. (ONCE AMENDED) The micro-lens built-in VCSEL as recited in claim 23, further comprising:
a substrate;
a lower electrode formed underneath the substrate;
a lower reflector;
an active layer comprising a light generating region; and
an upper reflector comprising a relatively lower reflectivity than that of the lower reflector,
wherein the window region comprises a diameter satisfying a Fraunhofer diffraction condition and is defined by the upper electrode and the micro-lens.

REMARKS

In accordance with the foregoing, the specification and claims 23, 24, and 54 have been amended. Claims 1-64 are pending and under consideration.
